Mammotome Revolve™

Dual Vacuum-Assisted Breast Biopsy System

The Mammotome Revolve™ biopsy system is designed for accuracy, repeatability and efficiency, while staying true to your core purpose — acquiring the best quality tissue during your patient's biopsy. Advanced tissue management technology minimizes tissue handling while eliminating procedure steps to improve workflow and get your patient off the table faster.

Mammotome®

Breast Biopsy System

The Mammotome® breast biopsy system was the first vacuum-assisted biopsy device on the market, and is also the most clinically acclaimed. The Mammotome® system enables biopsies to be performed under multiple imaging modalities utilizing the same control module.

Mammotome® EX Disposable Probes (for ultrasound-guided biopsies with the Mammotome® system)

Mammotome® Elite

Tetherless Vacuum-Assisted Biopsy System

The Mammotome® Elite biopsy system makes it easier to perform ultrasound-guided breast biopsies on even the most challenging lesions including small masses, vague masses, masses near the chest wall, masses in dense breast tissue, complex cysts and microcalcifications.¹

Providing confidence in challenging procedures

The vacuum assist, sharp cutting blade, and small size of the Mammotome® Elite system allows for more confidence and accuracy even in challenging clinical settings.

Mammotome Confirm™

Core Specimen Radiography System

Clinicians can verify the presence of microcalcifications during stereotactic biopsies quickly and easily with the Mammotome Confirm™ imaging system. The Mammotome Confirm™ system integrates seamlessly with the Mammotome Revolve™ biopsy device and allows for the immediate analysis of biopsy cores directly at the site of the biopsy, maximizing procedural efficiency while minimizing the amount of time the patient is on the biopsy table.

XPERT® 40

Specimen Radiography System

Whether in the biopsy suite or the OR, nothing beats the XPERT® 40 specimen radiography system in terms of versatility and speed. The XPERT® 40 system allows clinicians to identify the finest details in the widest range of specimens in the shortest possible time. The system provides unprecedented specimen visualization with digital mammography quality. It is easy to use, offers a touchscreen option and a full suite of annotation tools.

Neoprobe®

Gamma Detection System

The sensitivity, clinical flexibility, and ease of use of the Neoprobe® GDS have supported this vision of nuclear medicine for almost two decades. Whether used for Sentinel Lymph Node Biopsy in breast, melanoma or other cases, Radio Seed Localization of cancerous tissue in lumpectomies, or to target hyperactive parathyroid glands during parathyroidectomy, the Neoprobe® system guides surgeons to the right tissue accurately and reliably.

Sentimag®

 Magseed®

 Magtrace®

The Sentimag® Localization Platform is the first and only system to enable four surgical techniques in one platform. The Sentimag® system uses a highly sensitive reusable console and probe to accurately pinpoint proprietary magnetic seeds (Magseed®) and magnetic tracers (Magtrace®). These novel technologies are creating more possibilities for surgeons to perform breast conservation procedures.

Professional & Patient Education

Focused on better outcomes.
Your partner for breast interventions and surgery.

Professional Education

Delivered by skilled professionals showcasing experienced techniques and proven methodology, our educational events provide valuable information you can use to expand your clinical expertise.

Connecting breast care experts through education and clinical evidence:

Professional Webinars

Hands-On Courses

Society & Tradeshow Events

Clinical Evidence

Patient Education

Our breast health webinars are designed to provide valuable education for patients and caregivers. Key opinion leaders in radiology and breast surgery discuss topics that span the breast health continuum and answer the most common patient questions.

Episode 1: Screening Mammography

Episode 2: Breast Cancer Risk

Episode 3: Second Look Mammograms

Episode 4: Your Breast Biopsy

Episode 5: Preparing for Your Breast Surgery

Episode 6: Advances in Breast Cancer Surgery
